Investments in affiliated private investment funds—carried interest

Non-controlling interests (NCI) in consolidated entities

Past performance is not a reliable indicator of future performance.

At the end of each reporting period, accrued carried interest reflects what would be due from each investment fund as if the fair value of the underlying investments were realized as of such date, regardless of whether the amounts have been realized.

The change in accrued carried interest reflects amounts that are (1) realized and distributed by the fund, (2) market-related adjustments that are recognized as capital allocation-based income in the income statement, and (3) acquisition-related amortization. The change in accrued carried interest will fluctuate quarter to quarter.

- As of 6/30/2023, about \$17B of alternative fee-basis assets under management are eligible to earn carried interest
- In general, 50%-60% of accrued carried interest is expected to be retained in operating income with the remainder recognized as compensation expense
- Absolute performance of the following indices are an indicator of changes in accrued carried interest
